Site Install

Install Drupal using "Minimal Install" profile

```
drush en -y environment_setup_dev

# The "theme" feature is not turning on the frontend theme as expected.
drush en -y kbooui
drush vset theme_default kbooui
drush vset site_frontpage home

# The "configure_admin_ui" feature is not enabling the admin theme as
expected.
drush en -y adminimal

# Some features have to be reverted from the outset.
drush features-revert-all -y --force

# Note, when running locally adjust the path to your local docroot.
drush scr
